

Education

Bachelor's of Technology in Computer Science Engineering.

Experience

AWS Cloud / Full Stack Developer - F13 Technologies

July 2025 - October 2025

Joined as an AWS Cloud Intern and rapidly evolved into a full-stack builder, earning 6 AWS [certifications](#) while architecting modular, cloud-native applications using core AWS services.

Though my role focused on cloud infrastructure, I embraced full-stack development to deliver real-world impact designing and deploying production-grade web platforms from scratch.

This opportunity sharpened my ability to bridge cloud infrastructure with polished UX delivering scalable, recruiter-ready platforms that solve real problems.

Projects

- [Resume Matcher](#): Delivered a recruiter-grade resume matching platform, applauded by evaluators for its precision filtering and clean and clean UI

Tech Stack: [Resume Matcher](#)

[Resume Matcher](#) is a **fullstack React + Express app** with:

- **Frontend:** React 19, Vite, TailwindCSS, Framer Motion.
- **Backend:** Express.js, SQLite/Postgres, Supabase.
- **NLP:** Transformers, Puppeteer, Cheerio, PDF/Word parsers.
- **Deployment:** Vercel, with serverless Chromium for scraping.

Containerization: [Resume Matcher](#)

- [Multi-stage Docker Build & Docker Compose](#)

AWS: Networking

- [Security Groups & NACLs in VPC.](#)
- [Secure & Highly Available VPC with Private Subnets, Bastion Host, Auto Scaling & Load Balancer.](#)
